

Series 85

Vertical, Small Volume Gas Filter-Separators

The Series 85 filter-separator is used for smaller volume applications such as fuel gas conditioning filtration for compressors and engines used throughout the industry. They are designed and code stamped in accordance with ASME Code Section VIII Div. 1.

Stock units are available from 6" through 10" diameter at 150# ANSI rating

Typical Application:
Compressor Fuel Gas

PEACH® DynaSep™ (Series PCHG)

cartridges are used in the Series 85 filter-separator. This PEACH technology cartridge is a great choice for removing deformable and shear-sensitive contaminants found in natural gas applications. The rigid structure maintains an open porosity and permeability, while the tortuous flow path increases the probability for contaminants to impact filter fibers.

Cartridge Series PCHG

Available in polyester and polypropylene medias at 0.1, 0.3, 0.5, 1, 5 and 10 micron filtration.
